## **1. INTRODUCTION**

Academic visit is one of the teaching medium in conveying knowledge to the students. Through academic visit, the students will be exposed to the real situation of the working environment.

This academic visit was organized to meet the requirement of the syllabus for the subject AGR569 - BIOTECHNOLOGY for PLANTATION CROPS. In order to improve the understandings and knowledge of the students about the subject that have been taught in classroom, this academic visit was also one of the medium that can broaden the perspectives and thinking of the part four (4) (semester September 2018 - January 2019) students of Bachelor of Science (Hons) in Technology and Plantation Management and also can give a clearer vision on the subject being studied.

Through this visit, students are able to apply the knowledge in today's world and not only focus to the concept and theory alone. It aims for the involved students to become excellent, as well able to contribute to the development of the country and become professional personnel in the future.

## **2. OBJECTIVE**

- (i) To meet the requirement of the subject AGR569 - Biotechnology for Plantation Crops
- (ii) To give better and depth exposure of the subject AGR569 - Biotechnology for Plantation Crops to the part four (4) students of Bachelor of Science (Hons.) In Technology and Plantation Management.
- (iii) To learn more about the latest methods of breeding in agriculture.

## **3. OUTCOME OF PROGRAMME**

- (i) Students able meet the requirement of the subject AGR569 - Biotechnology for Plantation Crops
- (ii) Students get better and depth exposure of the subject AGR569 - Biotechnology for Plantation Crops to the part four (4) students of Bachelor of Science (Hons.) In Technology and Plantation Management.
- (iii) Students also learn more about the latest methods of breeding in agriculture especially in rubber plantation
