# PLANTATION INDUSTRY MANAGEMENT EXHIBITION AND SEMINAR (PIMES) 2018

## INTRODUCTION

The PiMES committee and UiTM (Melaka), Jasin Campus residents are very pleased to welcome all participants in the Plantation and Management Seminar (PIMES) which is organized by Faculty and Agrotechnology.

PiMES aims to give an exposure to the students about the procedure to make a poster by extracting information from their final year project. This seminar will sharpen their communication skill as well as they can exchange and share their research result, projects, experiences and new ideas related to all aspects of studies in plantation management and agribusiness, plant sciences, soil sciences, plant protection, plant biotechnology and agricultural engineering. We sincerely hope that you will enjoy and return home with plenty of inspiration to improve agro-industry plantation practices and research activities.

## OBJECTIVES

This Presentation is carried out intended to:

Presentation of FPA 690 aims to expose student to the methods of producing posters with extracting information from their year-end projects. Poster presentation will sharpen students' soft skills in terms of communication.

Implementation of academic conference will open up space to students who have a year-end project quality and participate in the oral presentation which resembles like the actual conference. Additionally, this academic conference also exposes students on research-current in the field of plantation as their preparation before involve in work environment.

## OUTCOME OF THE PROGRAM

After this program has been held, the students get exposure about the procedure to make a poster by extracting information from their final year project and they can learn how to prepare themselves for presentation before their enter work life . They also get to improve their communication skill as well as they can exchange and share their research result, projects, experiences and new ideas related to all aspects of studies in plantation management and agribusiness, plant sciences, soil sciences, plant protection, plant biotechnology and agricultural engineering. The participants also enjoy themselves and return home with plenty of inspiration to improve agro-industry plantation practices and research activities. Lastly, we also know how to handle and communicate with other people and we also know how to solve the critical problem that occurs before and during program.
