*Grandeur Chocolate, Selayang Selangor*

### "COMBINING EDUCATION WITH FUN"

This trip enhance students learn from actual hands-on experiences and will involve in real world experience makes learning more meaningful and memorable. This field trip also help the students to build up their self – confidence and their leadership skills for their future life. First organization we went is Malaysian Palm Oil Board, Bangi. MPOB is one of the premier government agency entrusted to serve the country's oil palm industry. This agency provide talk regarding the management and technology of oil palm processing. They also guide us to visit the museum and they provide demonstration to us about oil palm. Our trip is focus to learn about the new technology of oil palm, management of the agency and leadership skills that apply by the agencies. Second organization we went is Grandeur Chocolate is the company that owned by local Muslim which registered under Malaysian Cocoa Board. The company serves many services such as visit session to observe the processing process of hands-on in chocolate making. They also provide talk about processing in theory and practical. This trip is able to give experience and knowledge to us about processing of cocoa to produce chocolate. We have given full commitment and efforts in developing various beneficial knowledge in this program so that it is one of the program which help the students in leadership which is important for their future life. In addition, the programs are expected to improve the way of thinking of the students in preparing themselves to be more confidence. Early exposure of leadership skills can help the students to strengthen the relationship in the company that they will work soon.
